Objective

A full-time position in Web Development (or an entry level position in another area of Development) that can utilize my problem-solving skills and dedication to learning and improving.

Education & Personality Type

Boston University - Graduated with a major in Computer Science in September 2019. At the time of my enrollment, BU was ranked as a Top 20 Computer Science Department. The school overall continues to be rated highly See: <https://www.niche.com/colleges/boston-university/>.

Skills Development - Post-graduation, I felt that my skill set was not specialized, so I dedicated myself to developing skills through online resources. I have done over 500 online video tutorials to transition from theoretical CS knowledge to understanding applied real-world development technologies like .NET Core, .NET Framework, Angular, and React. After finishing each course, I have applied my knowledge by either expanding the course application or creating an application of my own.

Personality type is INTP ("The Engineer") - objective, logical, value honesty & integrity.

Skills

Self-Motivated Learner - Committed to improvement through self-study. Over the past year, I have learned .NET 5, .NET Framework, Entity Framework, Angular, React, CSS, and Bootstrap through self-study, in addition to using Python, Java, C, and MongoDB in class projects. Outside of Computer Science, other self-learned skills include music production, instrument building, and .

Effective Collaborator - Attempt to assume a meaningful role in group work, which includes taking the lead when necessary, and cooperating with others in projects, bands, sports teams etc to reach a desired end goal.

Cross-Platform Experience - Comfortable using Windows, Mac, and Linux for both development and everyday use. Enjoy configuring and experimenting with various Linux environments, and love using cross-platform tools like .NET 5/Core.

Projects

Dating App - Refresh token and email based functionalities using Angular, .NET 5, and PostgreSQL

.NET Framework App Expansion - Added features to Vidly app from .NET MVC Udemy course

Blog Site - Responsive site using .NET Framework and React with hooks, authentication and blog section

MEAN Stack App - Used IBM Watson API to analyze Youtube video titles

Flask/MySQL App - Social media site from Flask template with authentication and photo upload

International Experience

Took four semesters of Korean and one semester of Japanese in college, in addition to 7 years of French before college. Have travelled to Korea, Japan, Brazil, Turkey, Australia, South Africa, France, Ireland, the UK, and throughout the US (also drove from Boston to Seattle in 2019).

Activities and Interests

Music - Have played guitar for 13 years. Collaborated with other members to write songs. Recorded and mixed two EPs. Learned hip-hop production during quarantine. Have sold beats and participated in beat contests.

Outdoor activities - biking, hiking, downhill and cross-country skiing, and snowmobiling. Lettered all four years in HS in golf and baseball. Did alpine ski racing for six years. Learned and played intramural hockey in college. Fan of many sports.
